**Glass by Kathi™**  
"Fine Art In Glass"™

Katherine Bell  
Owner/Artist

Glass art can be used in every room of your house or commercial establishment. As a panel, it can be hung on a wall, in a window or installed in cabinet doors or a room divider. In a bathroom window, it is perfect for privacy and a great way to decorate. Why not upgrade the look of your entryway with new sidelites and a transom... and what about that accent window at the top of your stairwell? Glass art makes a great gift, too!

The possibilities are endless...

# Why choose Glass by Kathi?

## Custom Design

Glass by Kathi can create a unique piece to fit your decorating style and taste while taking into consideration the location and purpose of the piece.

## Presentation

All projects are designed using the premier software for stained glass design, Glass Eye 2000 from Dragonfly Software. With its vast libraries of glass, it allows us to closely represent the textures and colors of the finished piece during the design phase... and to more accurately estimate the cost of the final project. Superimposed over a digital photo of the bare window, your "dream window" comes to life!

## Quality Craftsmanship

We take great care to ensure that our superior craftsmanship and attention to detail is evident in every piece we create. We use only the finest glass and components and then meticulously assemble them to create your work of art.

*Let us transform your home or office into one of distinction...*

Before

With over 16 years of experience in fine art and design, owner Katherine Bell specializes in the design and fabrication of original stained glass art panels, windows, doors and many other unique glass art creations and gifts.

*"Glass is my canvas... my works employ the texture, color, richness and light transmission of the glass in such a way that it is almost as if I am painting with it... the natural pattern in the glass is my brush stroke. I achieve depth by using subtle color variations and patterns fused into the glass. It is a challenging and yet immensely satisfying medium with which to work."*
